

A-TEC OPTIMA 40: SLIM AND REMARKABLE EFFECTIVE

A-TEC OPTIMA 40

Slim, but remarkable effective and strong. Our newest member in the Optima-family is the Optima 40.

The modular design makes it possible to change the two front modules to suit another calibre within the .224 - .375 range. Extremely durable due to the hybrid design: A hardened aluminium alloy designed to handle high temperatures, and a stainless steel core that will secure the silencer's lifespan to meet most shooters' needs.
